Onit

O/M's new adjustable spotlight expands creative possibilities in lighting design. Available in four applications, it offers a wide range of uses in different ambiances. Onit is ideal for light modelling with spotlights.

Adjustable

The spotlight can be rotated up to 90° on horizontal axis and 330° around the vertical axis.

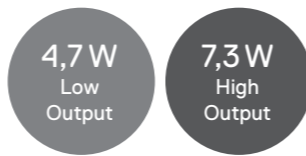

Light Source

O/M LED modules with excellent colour consistency (3 step-MacAdam) and long operating lifespan (>50.000h; L80/B10).

2700K
3000K
4000K

Beam angle

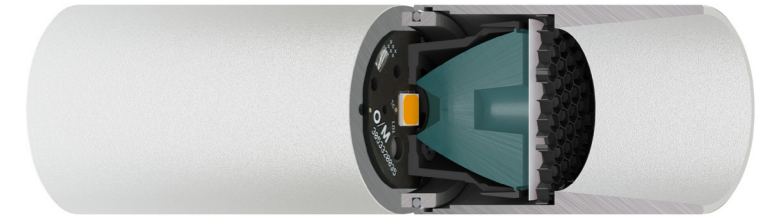

For a precise light effect, the spotlight's two beam angles can be customized with accessories.

Customisable

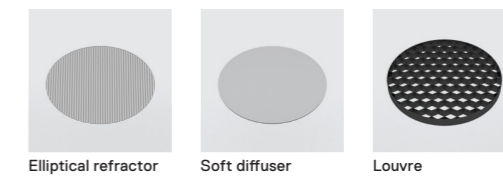

The aluminium body can be used with a number of accessories that are simply and quickly applied and changed at any time, customising its light effect.

Controlling intensity is easy with DALI dimming system in all versions.

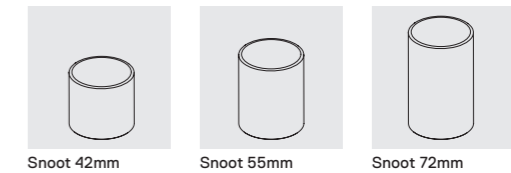

Accessories

Available separately and easily applicable after installation, Onit accessories can be used for final adjustments in light modelling.

Snoot

The three cut-off options for Onit have been designed to provide greater visual comfort, whatever its application.

Finishes Aluminium body with textured-paint finish ○.01 White ●.02 Black
