hoi-poi

designed by Co.Studio

Co.Studio's designs are driven by a practical approach. This type of fixture was created by the need for a high output uplight luminaire.

The dynamic duo, Gert & Christian, created the Hoi-Poi module with the focus on sustainability, in all its simplicity.

- ↗ **simplicity, timelessness & sustainability**
- ↗ **customizable setup**
- ↗ **form follows function**

eleven

designed by Justine Kegels

Lighting functions as art. A whole atmosphere in a room can be defined by light, which can be functional and decorative at the same time.

Designer Justine Kegels searched for a balance of straight and curved lines, which creates a certain softness. The name Eleven came from a spiritual experience, over the months designing, eleven was a very extant number in her life.

- ↗ **functional & decorative**
- ↗ **balance of straight and curved lines**
- ↗ **magnetic cover shelves**

cotton

designed by Anthony Boelaert

Inspired by the organic shape of waves, Anthony Boelaert created his Cotton range to be simple yet fluent. The typical shape creates a playful light effect, that defines his work. The Cotton range combines pendants, wall lamps, and table lamps. They become creative design elements in any interior.

- ↗ personalise to your taste, cotton is available in RAL colors on request.
- ↗ cotton flat in different sizes

hajō

designed by Serge Cornelissen

Say "Kon'nichiwa" to the hajō: a dazzling new glass luminaire for your wall and ceiling. hajō was designed by lighting designer Serge Cornelissen for ORBIT®. Serge found inspiration in Japanese art and meditation, and translated that to a unique lighting object. hajō is Japanese for wavy, hence its wave-like light pattern.

- ↗ what can we say: it's IP65 for God's sake
- ↗ combine bases and glasses
