COLLECTION

ARCHITECTURAL

ANDCOSTA

COLLECTION

b-pro

ANDCOSTA

b-pro

Technology merges with
architecture in sublime lighting
with a minimalist expression,
defining space by tracing elegant
geometries that float in space.

Its minimal light source
provides multiple options
for lighting.

Both the **BASIC** and
SYSTEM versions
are minimalist in style,
yet they offer endless
configuration options.
The minimalist body is
the essence of multiple
lighting and configuration
possibilities, especially
thanks to the use of an
articulation which when
anchored to different
surfaces, in the SYSTEM
version, **enables the
creation of unique
geometries.**

Individual ultra-fine
optical systems provide
very sharp direct and
indirect light.

DESIGN AndCosta Team — 2022

discover B-PRO on our website

b-pro BASIC

Hanging lamp with direct
and indirect light.
Aluminium structure white,
black or grey coated.
Opal polycarbonate diffusers.
Strip LED.

Available dimensions:
1000, 1200, 1800,
2400, 3000 mm.

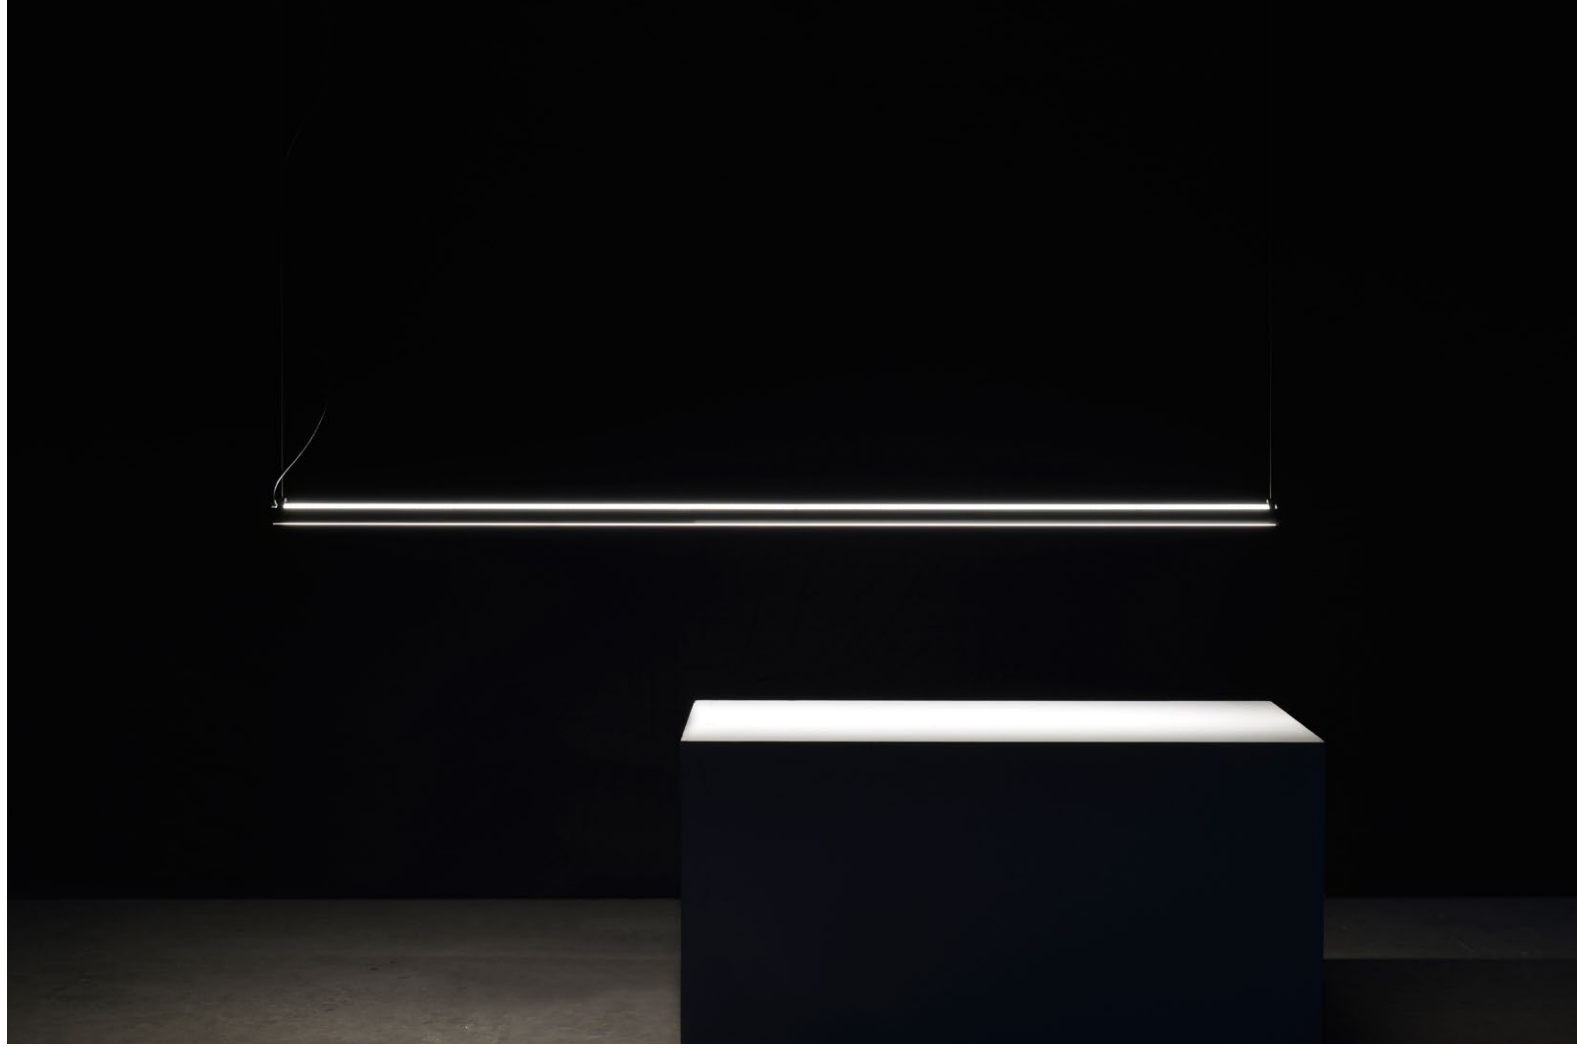

Accessories:
- fiberglass reinforced
ABS **suspension clips**
available in white,
black, grey, brass and
red finish;
- **separate switch**
direct/indirect.

b-pro SYSTEM

Lighting modular system with direct and indirect light connectable together or available in a standalone configuration. Aluminium structure white, black or grey coated.

Opal polycarbonate upper diffuser and opal polycarbonate or darklight optic lower diffuser. Strip LED on polycarbonate diffuser or LED module on darklight optic diffuser.

Available hanging lamps dimensions:
1000, 1200, 1800, 2400 and 3000mm.

Accessories:
- fiberglass reinforced ABS suspension clips available in white, black, grey, brass and red finish;
- polyamide 12 wall joint support;
- separate switch direct/indirect.

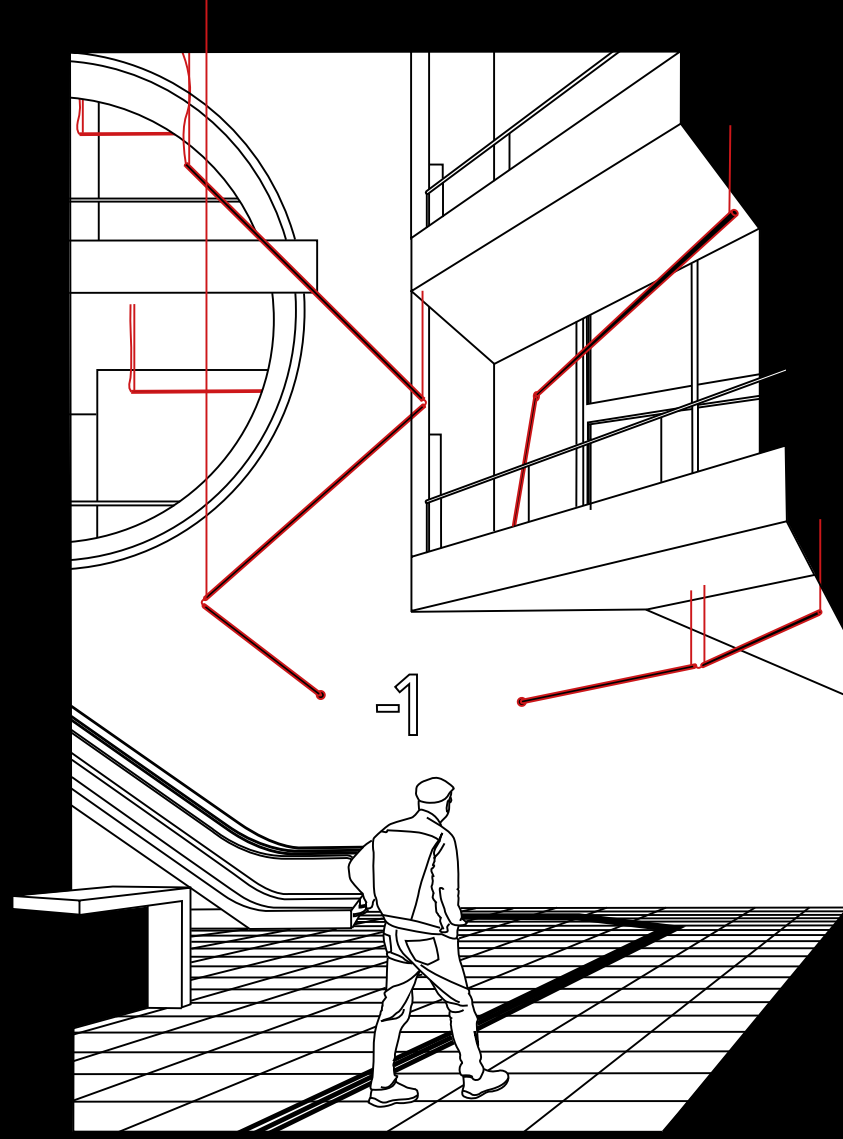

DESIGN AndCosta Team — 2022

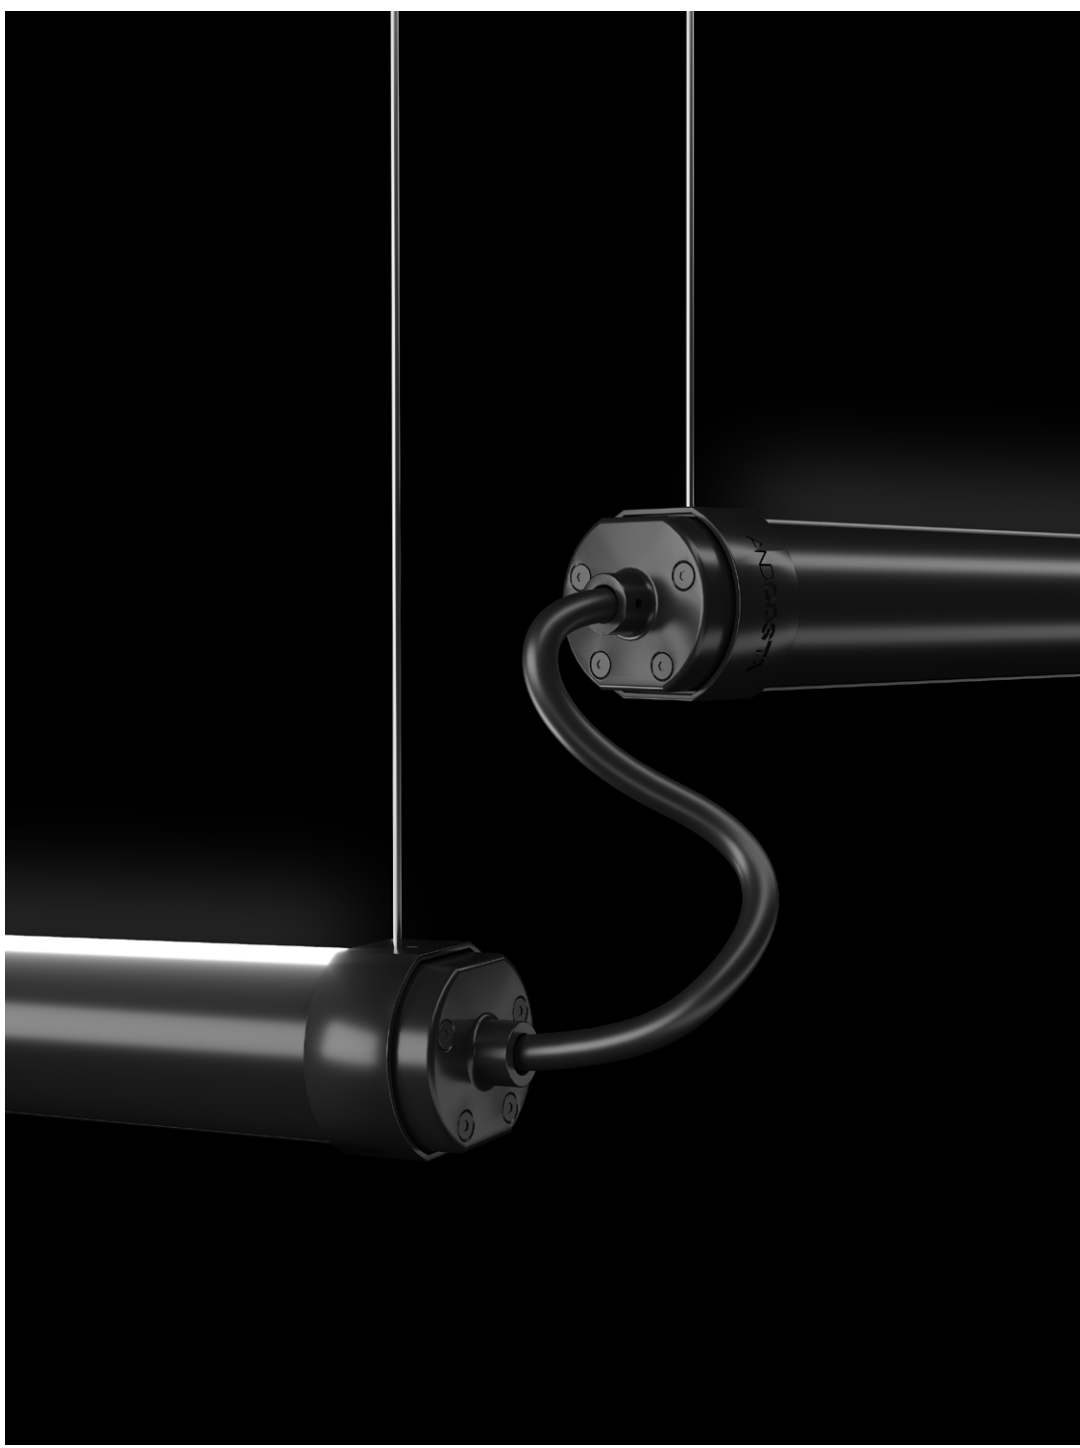

discover B-PRO on our website

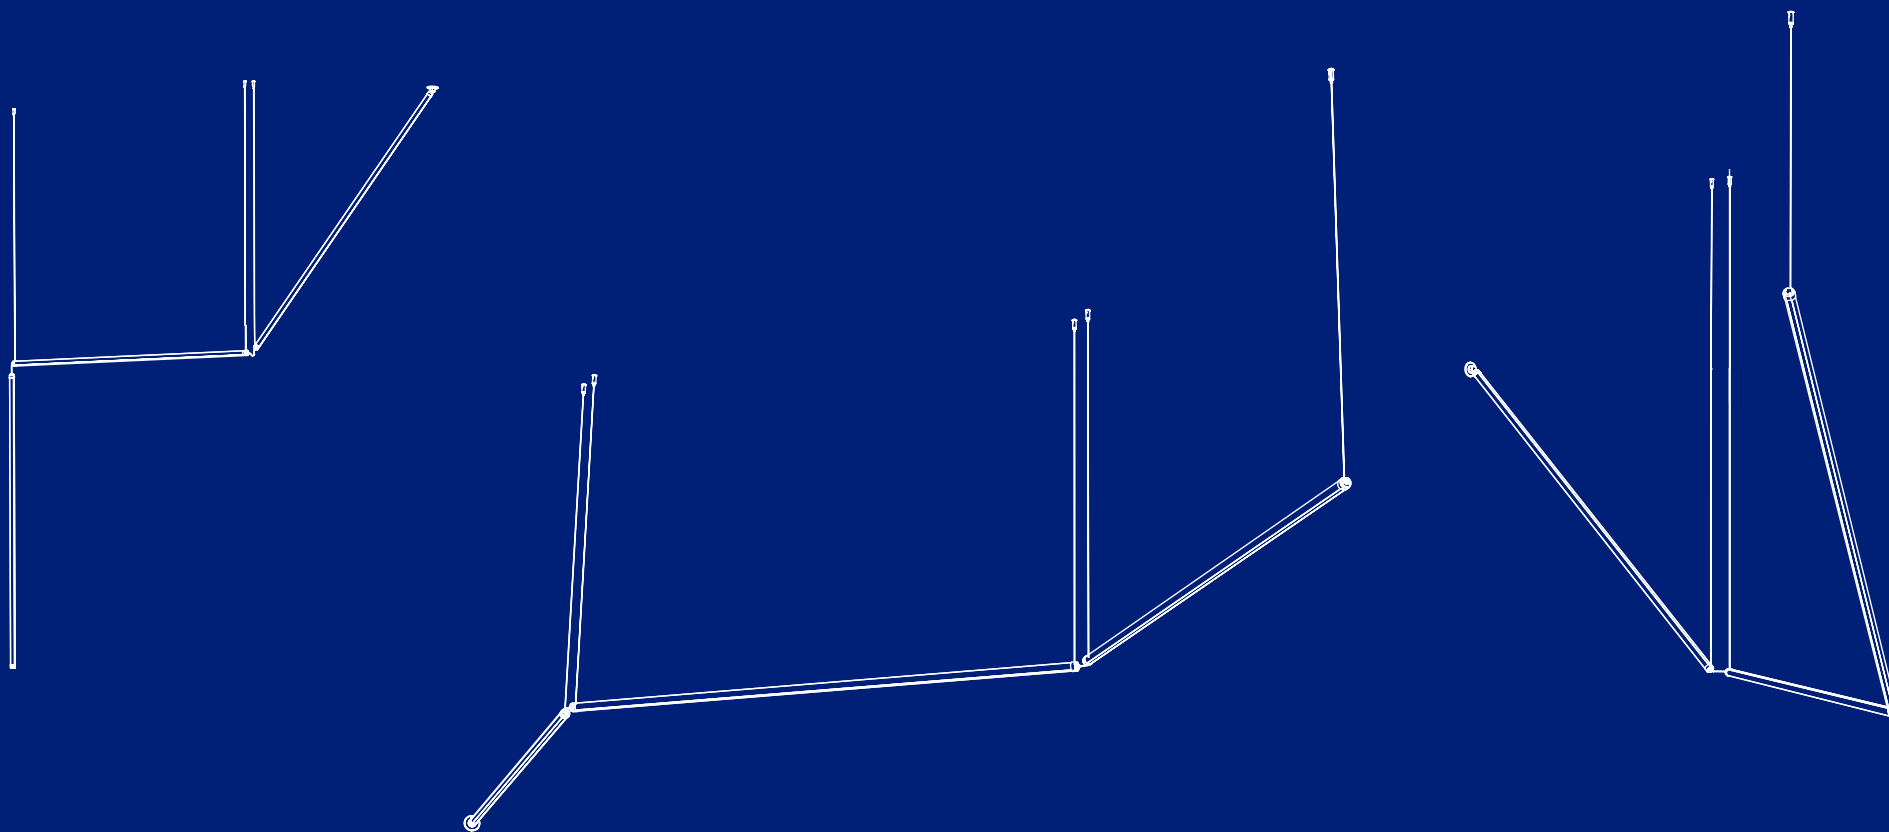

Use B-PRO SYSTEM to compose your own lighting environment

sizes

Our toolkit provides stand-alone biemission modules in 5 different sizes:
1000, 1200, 1800, 2400 and 3000 mm.

B-PRO system elements can be joined one to each other to a total maximum length
of 3 meters per single electrical connection.

optics

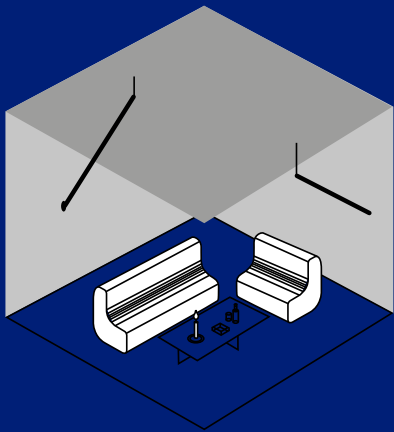

According to your needs you can choose the opal filter for more diffused light or the darklight optic which, thanks to its grid, sections the light beam of the high-efficiency LED into miniature alveoli, drastically reducing glare and improving visual comfort.

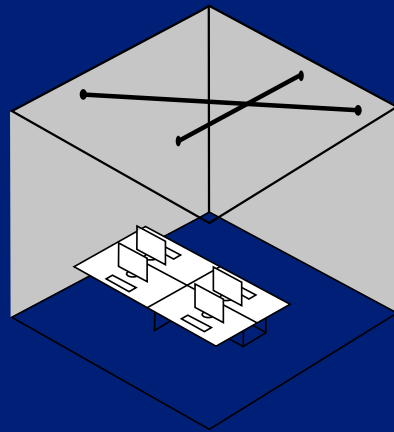

applications

B-PRO System elements can be connected together in the following ways:
wall-to-ceiling, wall-to-wall, ceiling-to-floor or pendant.

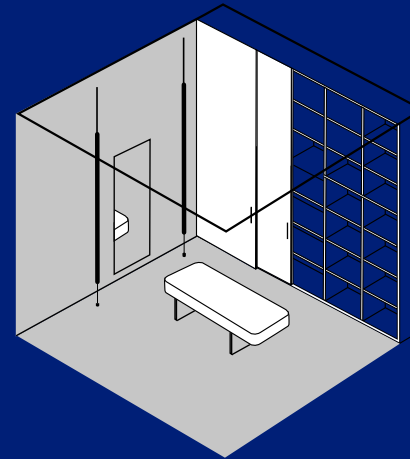

wall-to-ceiling

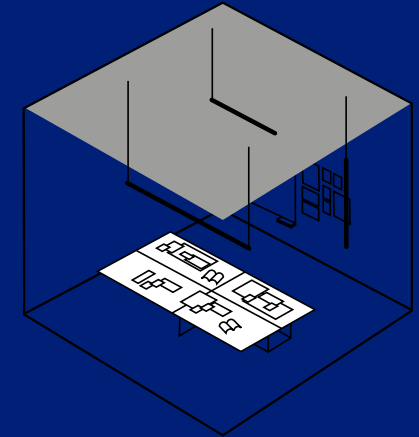

wall-to-wall

ceiling-to-floor

pendant

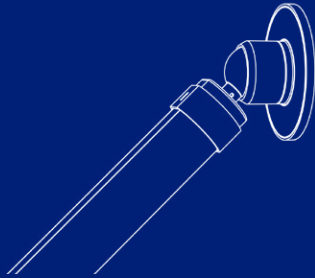

You can design your light pattern adding connectable B-PRO System modules moving into space with endless possibility of layouts.

The use of a wall joint which can be anchored to different surfaces, enables the creation of unique geometries.

about us

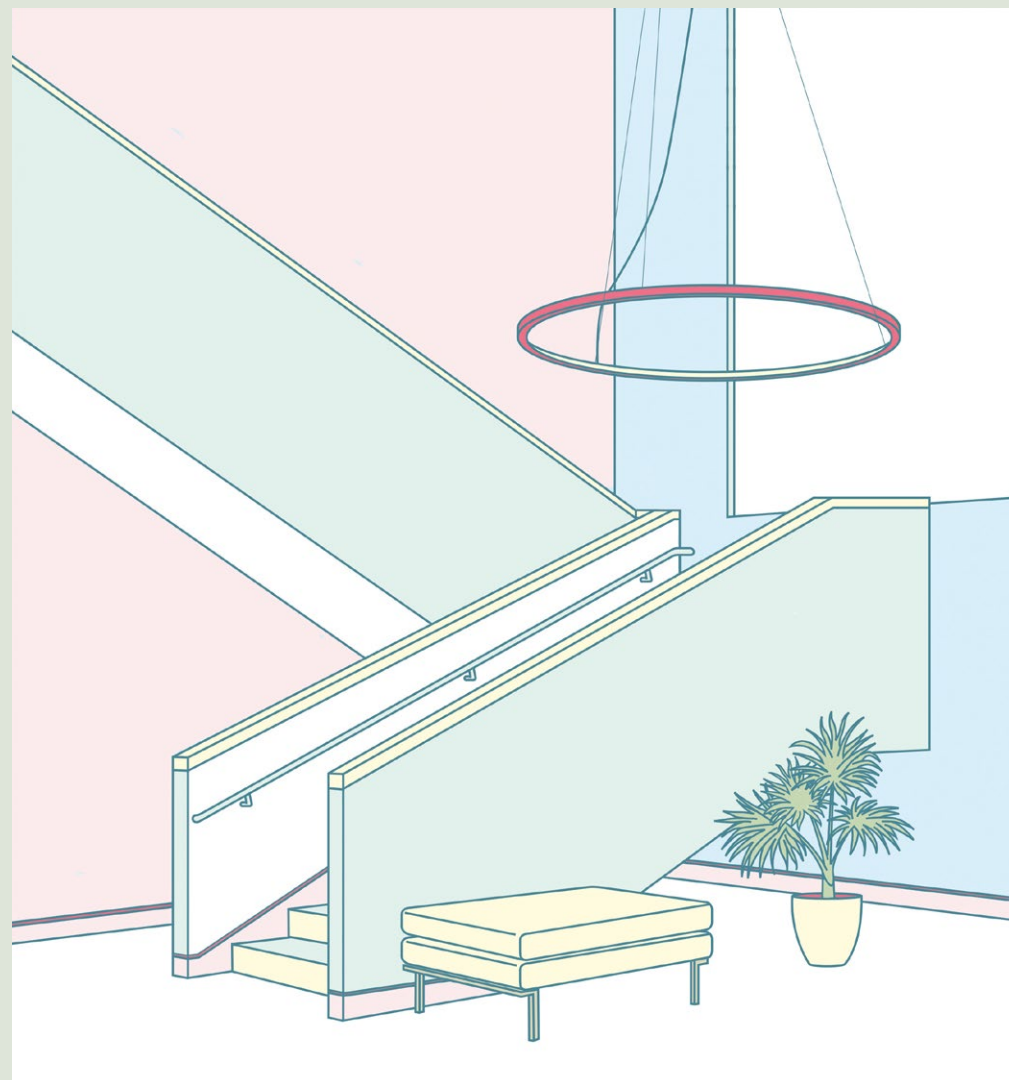

LIGHTING DESIGN MADE IN ITALY

Andcosta is based near Venice, an area that loves design and culture, past and present, craftsmanship and beauty. The company Andcosta is a space for research and planning of lighting design. Rooted in the traditions of Italian design, it creates lighting objects that reflect functionality and timeless beauty in their style.

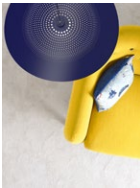

The company is located inside the walls of the **historical textile mill** of Thiene's town – an evocative place surrounded by the Venetian Prealps and home to the renaissance architect **Andrea Palladio**, the space is rich in culture and artisanal craft traditions, where the past and present represent the birth of the **Italian manufacturing industry**.

The restoration of this mill building, with its **industrial archeology**, has preserved its existing structure, enhancing and adapting its spaces to the requirements of our company.

The industrial architecture was skillfully restored and renovated and its **4000 sq metres of floorspace** now hosts the company's administration offices, the graphics and design team, production and logistics, a photo studio, showrooms as well as meeting and collaboration space. In a place where once textile products were made, now ideas and lighting objects are designed.
